**100% TESTED** **FACTORY VERIFIED**

**INSTRUCTIONS**

- 1** Remove about 3cm of the cable sheath.
- 2** Release the Cap.

Wire Cap.
- 3** Reeve the cable end through the cap. Seat each colour coded wire in to the matching colour coded cap position. And use wire-cutter to trim off excess wire.
- 4** Ensure the Wired Cap follows relative position as the Latch and cover it with both jaws.

Latch side UP.  
Wired Cap.
- 5** Thread the supplied cable tie through and then secure the cable by tightening it up & cut the cable tie.

**Disconnection**

1. Cut the cable tie.
2. Insert a flat screw driver to unlock.
